

# ACR 013:2023 CHECKLIST AND REMINDERS FOR THE AMTEC TEST CONDITIONS AND REQUIREMENTS FOR DISC HARROW

Application for AMTEC Test
The test applicant shall submit AMTEC-OP-F1 (Agricultural Machinery Test Application Form) together with
the following requirements:
AMTEC-OP-F16 (Waiver for Machine Specifications)
AMTEC-OP-F18 (Data Privacy Consent Form)
Technical Specifications of the Machine
The test applicant shall submit any document/s indicating the specifications of the machine upon application for testing. In case the said document/s are not available, the applicant shall fill out the Machine Specifications Sheet provided by AMTEC upon request.
Machine specifications sheet (shall be filled out upon request and receipt of copy from AMTEC in case the manual or brochure is not available)
Preparation and Operation of the Machine
The disc harrow shall be ready for testing. The officially designated operator of the test applicant shall operate, demonstrate, adjust, and repair the unit. Meanwhile, the officially designated representative shall decide on matters related to the operation of the machine.
Running-in of the Machine
A test run shall be conducted prior the official test as to check its condition and make necessary adjustments to the machine.
Test Plot
<ul> <li>The test applicant shall prepare at least three (3) test plots. Each test plot shall be:</li> <li>Rectangular with sides in the ratio of 2:1, as much as possible;</li> <li>Size of the test area should be at least 1000 m<sup>2</sup>;</li> <li>The headland shall be at least 3 m in length (depending on tractor size); and</li> <li>The test area shall be previously plowed.</li> </ul>
Other Test Conditions
<ul> <li>The following shall also be adequately supplied during the conduct of testing:</li> <li>Fuel tank filled to its full capacity;</li> <li>4 L or sufficient fuel for refilling after each trial;</li> <li>Tools for machine repair and adjustments; and</li> <li>The tractor to be used shall be compatible with the harrow in accordance with the manufacturer's specification of required power.</li> </ul>
Machine Setting
The gear setting of the tractor shall be recorded.
$\Box$ A traveling speed of 7-8 kph shall be maintained during the operation.

Recommended Tilling Pattern				
For the disc harrow, the alternating headland pattern is recommended.				
For the disc harrow, the alternating headland pattern is recommended.				
<ul> <li>Materials of Construction, Con</li> </ul>	nstruction, Performance, and C	Other Requirements		
		t performance parameters of the machine		
including the following requirement				
Materials of Construct				
Criteria	Requireme	ent as per PAES 120:2001		
Frame, Gang Axle, Scraper, Gang Angling Mechanism, and Hitch	□ All shall be made of mild st	eel.		
Spool	□ It shall be made with cast in	ron.		
Hitch Pin	□ It shall be made with carbo	on steel.		
Disc Blade	□ Shall be made of carbon s	steel with at least 80% carbon content (AISI		
		east 0.0005% boron content.		
Construction Requiren				
Criteria		ent as per PAES 120:2001		
	Items	Requirements		
	Length, m	2 to 8		
	Width, m	1 to 10		
Disc Harrow Construction	Height, m	1 to 1.5		
	Number of gangs	Minimum of 2 for offset and single- action disc harrow		
		Minimum of 4 for tandem disc harrow		
	Type of disc	Plain or notched		
	Number of disc	Minimum of 4 in each gang		
		400 to 650 (600 maximum for four disc		
	Diameter of discs, mm	gang)		
	Thickness of discs, mm	4 to 6		
	Concavity (depth), mm	100 to 300		
	Disc angle, °	24 maximum		
	Length of spool, mm	175 or 225 ± 2		
	Ground clearance, mm	125		
	Weight per disc, kg	25 to 70		
	Drawbar power	1 to 2.5		
	requirement per disc, kW	1 10 2.0		

Other Requirements	
Criteria	Requirement as per PAES 120:2001
Others	Requirement as per PAES 120:2001            The frame shall be rigid and durable.             The gangs shall be so attached that their angles can be easily changed to desired position with gang angling mechanism. (a) The rear gang(s) in offset and tandem disc harrow shall be so arranged that the disc(s) of rear gang(s) shall not make the same path formed by front gang(s). (b) Bumpers may be provided in the inside end of the front gangs of the single-action and tandem disc harrows to prevent the inside discs from rubbing each other at any gang angle in which the gangs are set. (c) The discs in each gang shall be firmly fixed by spools and there shall not be any relative movement between the disc and the axle.             The scrapers shall be set in such a way that they shall not touch the face of disc and shall be able to scrape the soil effectively. Arrangement for adjusting the scrapers shall be provided.             Adequate arrangement for lubrication of bearings shall be provided.             Ball or tapered roller bearings with special dirt seals shall be used.             Both faces of spool coming in contact with the disc face shall be finished for proper gripping.             The hitch of disc harrow, provision may be made for attaching a shovel or a sweep to cut and uncut the soil between two gangs.             In single-action disc harrow, provision may be made for attaching a shovel or a sweep to cut and uncut the soil between two gangs.             The harrow shall be easy to operate such as: (a) Hitching and unhitching, (b) Depth of cut adjustment, (c) Position change of harrow
Performance Requirer	work position, and (i) Scraper adjustment. nents
Criteria	Requirement as per PNS/PAES 120:2001
Depth of cut, mm, maximum	As specified by the manufacturer
Quality of work	During operation, the harrow shall produce good quality of work such as: (a) The ability to harrow throughout the complete implement width and capacity to cut and incorporate plant residues in the soil at minimum blockages.
Workmanship and finis	
Criteria	Requirement as per PNS/PAES 120:2001
Presence of manufacturing defects	The disc harrow shall be free from manufacturing defects that may be detrimental to its operation.
Presence of rust	Except for disc blades, other uncoated metallic surfaces shall be free from rust and shall be painted properly.
Presence of sharp edges and surfaces	The disc harrow, except for disc blades, shall be free from sharp edges and surfaces that may injure the operator.

If the test plot does not conform with the recommended quantity and characteristics, AMTEC shall not proceed with the test. Should the test applicant request the conduct of the test despite the non-conformity to the test requirements identified by AMTEC, the applicant shall sign the AMTEC Waiver for Nonconformity to Test Requirements.  □ AMTEC-OP-F24 (Waiver for Nonconformity to Test Requirements) On the other hand, if the machine stops due to breakdown or malfunction during the test run affecting the machine's performance, the test may be suspended. If the machine cannot continue the operation, the test shall be consequently terminated.  ■ Other Assistance During Test I. For field and laboratory testing outside the AMTEC premises, the applicant shall shoulder the transportation expenses (i.e., fuel, tall fees, vehicle rental, plane fare, sea fare, etc.) of the AMTEC Staff assigned for the testing activity. 2. The applicant may assist the AMTEC Staff in looking and/or making arrangements for hotel accommodation near the test site. 3. The applicant shall provide any form of shed or sunshade (e.g., tent, umbrella, etc.) for the test equipment, samples (if applicable) and AMTEC Staff during the testing activity. 4. The applicant shall provide any form of shed or sunshade (e.g. tent, umbrella, etc.) for the test equipment, samples (if applicable) and AMTEC Staff during the testing activity. 5. The applicant shall provide any form of shed or sunshade (e.g. tent, umbrella, etc.) for the test equipment, samples (if applicable) and AMTEC Staff during the testing activity. 5. The applicant shall provide any form of shed or sunshade least 50 % of the testing fee which is non-refundable but transferrable. 5. In cases of additional testing during the field, the test applicant shall shall end the staff as a safe and convenient restroom near the test site during the testing during during the field, the test applicant shall immediately pass the required documents and settle at least 50% of the testing proper. 4. Additional te		Suspension and Termination of Test
