

Agricultural Machinery Testing and Evaluation Center 1977

ACR 045:2023 CHECKLIST AND REMINDERS FOR THE AMTEC TEST CONDITIONS AND REQUIREMENTS FOR MIST BLOWER

■ Application for AMTEC Test
The test applicant shall submit AMTEC-OP-F01 (Agricultural Machinery Test Application Form) together with
the following requirements:
□ AMTEC-OP-F16 (Waiver for Machine Specifications)
□ AMTEC-OP-F18 (Data Privacy Consent Form)
■ Technical Specifications of the Machine
The test applicant shall submit any document/s indicating the specifications and other relevant information
of the machine upon application for testing.
□ Operator's manual with complete specifications as indicated in Annex B of PNS/PAES 156:2010
□ Brochure
\square Machine specifications sheet (shall be filled out upon request and receipt of copy from AMTEC in
case the manual or brochure is not available)
■ Preparation and Operation of the Machine
The mist blower shall be ready for testing. The officially designated representative of the test applicant shall
decide on matters related to the operation (operate, demonstrate, adjust, and repair) of the machine.
Running-in of the Machine
A test run shall be conducted prior the official test as to check its condition and make necessary
adjustments to the machine.
■ Other Test Necessities
The following shall also be adequately supplied during the conduct of testing:
☐ Fuel sufficient for the entire duration of test trials; and
□ Engine oil.
■ Machine Setting
The mist blower shall be tested at all its settings to compare its results to one another. Cut-off valve shall be
preset at maximum setting.
■ Performance and/or Fabrication Test Requirements
AMTEC shall conduct various tests and verification on different performance parameters of the machine
including the following requirements as per PNS/PAES 155:2010:
■ Fabrication Requirements

Requirement as per PNS/PAES 155:2010

□ Shall conform to the operator's body, distributing weight evenly, and

□ Shall be made of chemical resistant polyvinylchloride or better

presenting operating controls in a reasonable location and

☐ Shall consist of tank, hose, nozzle, wand, and engine.

configuration to avoid exhaustion to the operator.
☐ Shall have a net weight of not more than 15 kg.

 \square An adjustment knob shall be attached to the wand.

 \square Shall have a length of at least 0.3 m.

material.

Criteria

Backpack Mist Blower

General

Wand

Agricultural Machinery Testing and Evaluation Center 1977

Tank	 ☐ Shall be made of non-corrosive material (e.g., engineering plastic) and shall be made of polyethylene or better material. ☐ Shall have an airtight and water-tight construction to avoid leakage. It
	shall have a drain valve for maintenance and cleaning.
	☐ Shall also have a provision for filtration materials.
	☐ Tank cover and gasket shall be made of chemical-resistant
	polyvinylchloride or better material. □ Flexible hose shall be used to attach the nozzle to the engine and tank.
Hose	☐ Shall be made of chemical resistant polyvinylchloride or better
	material.
	☐ Hose clamps shall be made of non-corrosive material.
	☐ The load bearing part of the strap shall be at least 50 mm wide. A load-
	bearing waist strap is desirable.
	☐ Shall be made of durable and non-absorbent material (e.g., nylon
Strap	fabric) with at least 1.5 mm thickness and 35 mm width. It shall have an
	adjustment provision.
	☐ Strap pads shall be provided for operator's comfort. It shall have a thickness of at least 10 mm and a width of at least 65 mm.
	☐ Shall be installed on the handle of the mist blower for instant stopping
Cut-off valve	of the blower.
	☐ Shall have a variable setting for adjusting droplet sizes.
Nozzle	☐ Shall be made of non-corrosive material.
Quick release mechanism	□ Shall be provided for emergency purposes.
Mounted Mist Blower	
Mounted Mist Blower	☐ Shall consist of the main frame, tank, blower, and engine.
Mounted Mist Blower	☐ The main frame shall be made of AISI 1020 or better material with a
Mounted Mist Blower	☐ The main frame shall be made of AISI 1020 or better material with a thickness of at least 6 mm.
Mounted Mist Blower General	 □ The main frame shall be made of AISI 1020 or better material with a thickness of at least 6 mm. □ All welded parts shall be in accordance with the criteria set in AWS
	 □ The main frame shall be made of AISI 1020 or better material with a thickness of at least 6 mm. □ All welded parts shall be in accordance with the criteria set in AWS D1.1:2000.
	 □ The main frame shall be made of AISI 1020 or better material with a thickness of at least 6 mm. □ All welded parts shall be in accordance with the criteria set in AWS D1.1:2000. □ There shall be no crack on welded area.
	 □ The main frame shall be made of AISI 1020 or better material with a thickness of at least 6 mm. □ All welded parts shall be in accordance with the criteria set in AWS D1.1:2000.
	 □ The main frame shall be made of AISI 1020 or better material with a thickness of at least 6 mm. □ All welded parts shall be in accordance with the criteria set in AWS D1.1:2000. □ There shall be no crack on welded area. □ There shall be no fusion between adjacent layers of weld metal and
General	 □ The main frame shall be made of AISI 1020 or better material with a thickness of at least 6 mm. □ All welded parts shall be in accordance with the criteria set in AWS D1.1:2000. □ There shall be no crack on welded area. □ There shall be no fusion between adjacent layers of weld metal and between weld and base metal. □ Shall be made of non-corrosive material (e.g., engineering plastic). □ Shall have an airtight and water-tight construction to avoid leakage.
	 □ The main frame shall be made of AISI 1020 or better material with a thickness of at least 6 mm. □ All welded parts shall be in accordance with the criteria set in AWS D1.1:2000. □ There shall be no crack on welded area. □ There shall be no fusion between adjacent layers of weld metal and between weld and base metal. □ Shall be made of non-corrosive material (e.g., engineering plastic). □ Shall have an airtight and water-tight construction to avoid leakage. □ Shall have a drain valve for maintenance and cleaning.

Salety, workmanship and rin	1211	
General	☐ The tank and sprayer frame shall have rounded corners.	
	\square There shall be a gap between the fuel tank and the engine.	
	☐ Safety locks shall be provided to avoid accidental opening of the valve.	
	☐ Mufflers shall have a protective cover to protect from burns.	
	☐ Cushions shall be installed for backpack mist blowers for comfort.	
	☐ Fuel lines and other fuel components shall have protective sleeves to help prevent rupture of lines from snagging over incidental damages.	
■ Suspension and Termination of Test		
	skdown or malfunction during the test run affecting the machine's uspended. If the machine cannot continue the operation, the test shall	
Should the test applicant request the conduct of the test despite the non-conformity to the test requirements identified by AMTEC, the applicant shall sign the AMTEC Waiver for Nonconformity to Test Requirements.		
	Nonconformity to Test Requirements)	
■ Testing Fee		
1. The testing fee for mist blowe	er is PhP 13,000.	
2. To proceed through AMTEC test, the test applicant shall settle at least 50 % of the testing fee which is		
non-refundable but transferre		
3. In cases of additional testing during the field, the test applicant shall immediately submit the required documents and settle at least 50% of the testing fee within five (5) working days after the testing proper		
☐ Additional testing, number		
4. Payment/s shall be directed	· · · · · · · · · · · · · · · · · · ·	
☐ Through UPLB Cashier's Of	ice (8AM to 12PM): AMTEC Trust Fund Code No. 8271632-40A2040101000	

1892-1003-29 ■ Other Reminders

 All manufacturers, fabricators, assemblers, and importers (MFAI) shall secure a Certificate of Conformity (CC) from the Bureau of Agricultural and Fisheries Engineering (BAFE) which guarantees that their agricultural and fisheries machinery conforms with PNS/BAFS PABES or other relevant standards identified by BAFE. More information about the application for CC can be found at http://bafe.da.gov.ph/index.php/certificate-of-conformity-of-manufacturers-fabricators-assemblers-distributors-dealers-importers-and-exporters/.

☐ Through Landbank (8:30AM to 3PM: UPLB Trust Fund Account No. 1892100507 or UPLB FI Account No.

2. All MFAI shall employ an Agricultural and Biosystems Engineer (ABE), as mandated by RA 10915 (ABE Law), who shall facilitate all activities and concerns pertinent to AMTEC testing and BAFE requirements. Do you currently have an ABE in your roster of employees?

— Yes
— No
